## FOREWORD

Kivells are pleased to have received instructions on behalf of SW & MA Poad to disperse their NMR Recorded, Homebred, Holstein Friesian herd of Dairy Cattle, with the first consignment being removed to Holsworthy Livestock Market for convenience of sale on Wednesday 23<sup>rd</sup> July 2025.

This is a homebred, cubicle-housed, and robotically milked herd that has been managed to a high standard. The cows are fed a simple total mixed ration consisting of grass and maize silage, with concentrates fed to yield through the robotic system. The sale includes a high proportion of freshly calved cows and heifers, forming the first part of what is a very genuine herd reduction due to a change in farming policy.

The Poad Family's breeding policy has always focused on producing strong, well-balanced cows with excellent udders and the longevity needed to produce high-component milk efficiently. Most of the cows are served to the British Blue, with the remainder to Holstein sexed semen.

The cows are vaccinated for IBR and are monitored through tag testing for BVD, with no positive results recorded. The entire herd is also screened for Johne's and all cows included in the sale have tested negative.

Herd performance is equally impressive, with a current NMR average of:

**9,718Kgs 4.69%BF 3.42%PTN .**

### **Average cell counts of cows in the sale cc48**

This is an excellent opportunity to purchase genuine, high-performing dairy cattle from a well-bred and carefully managed herd that would go on and perform in a variety of different dairy systems. We recommend attendance at this sale.
