Foreword

Kivells are delighted to have received instructions from Cowdray Home Farms to disperse the entire NMR recorded herd of Holstein Friesian dairy cattle. The herd will be removed to Exeter Livestock Centre for convenience of sale on Tuesday 24th November 2026.

The Cowdray Home Farm herd has existed in various sizes since the Pearson family's stewardship of the Cowdray Estate started in 1909. The Pearson family and executive management team have recently taken the difficult decision to close Cowdray Home Farm and cease in-hand farming following careful consideration of the direction of the Estate. The Home Farm will be let in 2027.

It is therefore with sadness that Kivells are instructed to undertake a dispersal sale as part of the Estate's strategy.

We are very grateful to the farm team, as well as to the suppliers and partners who have supported Cowdray Home Farm over many years.

Herd average

NMR Herd average 10,400Kgs 4.50%BF 3.70%PTN cc138

The cows are milked twice daily through a Herringbone Parlour and are **cubicle housed** during the winter months.

The sale comprises: 237 freshly calved cows and heifers who have calved mainly from August to November 2026. 4 In Calf Heifers, 46 Bulling heifers & 35 Heifer Calves.

Herd Age:

114 first calvers, 63 second calvers, 36 third calvers, 26 fourth calvers and 18 fifth calvers, 7 sixth calvers and 4 seventh calvers.

Calving Pattern:

Whilst the herd is predominantly Autumn Calving there are a good number calving through the winter months with the following pattern:

August (53), September (62), October (29), November (26)
December-January (48) & February-April (9

Herd Health
The herd is vaccinated for Bluetongue, Lepto & IBR. BVD free. Johnes screened with no known cases. TB4 area

Auctioneer's Comments:
This dispersal presents an excellent opportunity to purchase genuine, well-bred Holstein Friesian cows and heifers from a mainly Autumn calving herd. The cows at Cowdray have an exceptional willingness to milk and we have no doubt that they will go on and perform well! This is also a rare opportunity to purchase from a Dispersal in aTB4 area, if you are looking for strong milky cows this is a sale not to be missed!

Kivells

Vet Comments:

I have been involved with the Cowdray herd at Moor Farm for almost 20 years and can confidently say that it is a herd in excellent condition.

The herd has consistently achieved good production figures, supported by a strong focus on health and disease control. BVD and Johne's disease control programmes have been in place for many years, with neither disease believed to be present in the herd. Vaccination programmes for Leptospirosis and BTV3 are also in place.

Somatic cell counts and lameness incidence have remained very low, while calf health has been excellent, with negligible levels of disease.

Overall, this is a healthy and productive herd, with a long-standing commitment to high standards of herd health and welfare. I would have every confidence in recommending it to prospective purchasers.
