Foreword

On behalf of Kivells, we would like to thank the Ashton Family for their very kind instructions to disperse their Morebridge herd on Friday 6th November at Exeter Livestock Centre.

Our Morebridge herd of Pedigree Jerseys was established in 1983 at Stoneleigh Manor Farm located between the village of Moreleigh and hamlet of Garabridge in South Devon.

The herd then moved to Awsland Farm near Torrington in 1994. For several years we were the main supplier of milk to Stapleton Yoghurt and in 2020 we started to supply Parkham Farms for cheese.

Emphasis has always been to breed and feed the herd to maximise our milk contract, using bulls which are positive for fat, protein and milk. Being an **autumn block calving herd** we have always favoured bulls with a plus on daughter fertility. Top bulls that have had a big influence on the herd would be Victorious, Lemonhead and Casino which have added a lot of strength and type to the herd. We have recently added some Danish genetics to the herd to increase constituents. We have also experimented with cross breeding with a small stature Holstein and have been impressed with the conformation and output.

This is a closed herd, milked twice a day through a herringbone parlour. Cubicle housed in the winter and working closely with our nutritionist we feed a partial TMR (Maize, grass silage, blend and molasses) and fed concentrates to yield through the parlour. They are grazed throughout the summer.

Thank you to all purchasers and we hope they do you very well.

The Ashton Family

Herd Health

We work closely with our vet achieving a high health status with high attention to detail. We are vaccinating for IBR, BVD, Leptospirosis, Covexin and Bluetongue. We have a low mastitis rate of 5/100 and have used selective dry cow therapy for 18 years

All youngstock are huskvac vaccinated before turnout for their first grazing season. Cows are routinely foot trimmed at 100 DIM and at dry off.

We have regularly johnes tested, and monthly milk record with NMR.

All the cows have been foot trimmed and have had a post calving check from our vet before todays sale. Dry cows for sale will have been vaccinated with Cryptum and Bovigen scour vaccine.

NMR Herd Average:

The NMR herd average is 7528Kgs 5.44%BF 3.85%PTN cc99

Auctioneer Comment

I have had the pleasure of selling cows from this herd for many years now and they always go away and perform well! I have received many great comments about how good the Morebridge cows perform and breed which is a real testament to the dedication and management of the Ashton Family. With so few Jersey dispersals, this Sale is a very important one and certainly not to be missed by any breeder or producer looking for quality Jerseys.

Mark Davis – Kivells

Vet Comment

Torch Farm Vets has been working with the Ashton family at Awsland Farm for ten years. The herd is a delight to be associated with as they hold high standards for themselves and their animals.

There is a comprehensive vaccine and monitoring programme in place within the milking herd including BVD, Leptospirosis, IBR and Salmonella as well as scour vaccines (cryptosporiosis and rota/corona/e coli) during the dry period. Routine monitoring of youngstock is performed for BVD on an annual basis. Bulk milk monitoring is in place for BVD and IBR.

Johnes is actively monitored and controlled in line with the national johnes management control plan.

With an autumn calving block fertility has always been a priority and the attention to detail given around calving and service is exemplary. Udder health is also an area that is managed incredibly well as shown by low BMSCC and low mastitis rates.

These cows will be an excellent addition to any herd and we will be sad to see them go

Thanks, Reb

Harpers Feed Consultant comment

The Ashton Family, have successfully bred a high-performing herd of Autumn calving Jerseys, maximising the milk quality on their Parkham contract. Milk quality and milk yields speak for themselves when you look at the catalogue.

Lactation Average: 7,528 litres, Rolling BF and Protein Averages: 5.44% butterfat and 3.85% protein

Cows at this farm are milked twice daily and grazed during the summer months, and then during winter months fed a simple diet of Grass Silage, Maize Silage and blend outside with feed to yield in the parlour.

It has been a pleasure working with the Ashton family, and I wish them all the best in their next venture.

Alex Cornish. Dairy Consultant
