FOREWORD

Kivells are delighted to have received instructions on behalf of R & C Ward, Trehole Farm, Crackington Haven to disperse their Closed, Pedigree, Homebred and NMR Recorded Herd of British Friesian Dairy Cattle. The herd will be removed to Holsworthy Livestock Market for convenience of sale on Wednesday 10th December 2025.

The 'Crackington' herd was established in 1977 by Rex and his father John Ward, who began dairy farming with a strong emphasis on quality functional cows. In 1988, the running of the farm passed to Rex and his wife Cheryl, who continued to build on his father's foundations. In recent years, Rex and Cheryl's son Dan and his wife Lisa have shown a genuine enthusiasm for cow management and have taken a careful and considered approach to breeding, resulting in a well-balanced, highly efficient herd with good constituents.

The cows are run on a simple yet effective grass-based system and grazed from February-November. They are fed a simple ration, consisting of grass silage, wholecrop and blend. The cows are run as one group and fed a flat rate. The cows are milked twice daily through a herringbone parlour and are cubicle housed. The sale contains 125 first-third calving cows and heifers.

This is a block autumn calving herd, with a breeding programme that includes both beef and British Friesian sexed semen to maximise efficiency and calf value. The herd health status is exemplary: All cows are vaccinated for Lepto, BVD and salmonella and the herd is also BVD accredited free. The whole herd has been Johnes screened and no cows in the sale have tested positive. Selective dry cow therapy is practiced within the herd and approximately 70% of cows receive sealant only. The whole herd was TB tested on 3rd November 2025. These cows represent the type of medium-sized, efficient, modern dairy animal that performs well on a variety of systems.

NMR Herd Average – 6264Kgs 4.65%BF 3.61%PTN

Average cc of cows in the sale: cc74

Auctioneer's comments:

This is a true dispersal from a closed, well-managed unit. The cows are fertile, productive, and accustomed to a practical simple system making them ideally suited to a range of dairy operations. With the herd's outstanding health, fertility, and performance background, this is an opportunity not to be missed. I have had the pleasure of working with the Ward Family for many years and I wish them all the best for the future. We strongly recommend your attendance at Holsworthy Livestock Market for this sale.

Mark Bromell

Vet's comments:

Castle Veterinary Group has had the pleasure of conducting the regular vet visits to Dan and Rex Ward over the last 30 plus years. During this time, we have seen fantastic conception rates and very few health problems in this extremely well managed, block calving herd. The herd is vaccinated for BVD, Lepto and Salmonella, with Johnes managed effectively and kept to a low incidence. We would like to thank the Ward family for their continued support and wish them all the best for the future.

Andy Eve BVetmed MRCVS
Castle Veterinary Group

Genus ABS Comments:

The Crackington Herd have been with Genus for over 30 years and RMS for 15 years. Fertility on farm has been consistent with the 2024/5 breeding season seeing Conception Rates: 53%, Pregnancy Rates: 40% and Insemination Rates: 79.2%. Cows have been bred for health, fertility and temperament along with fat and protein. The herd has used top proven and Genomic sires from Genus using a sexed and beef strategy.

Breeding within the herd by:

'Goonhilly Elijah, Carrickshock GTW, Goonhilly Cornelly and Beaufort Beaufort Jackery (sexed)'
