FOREWORD

Kivells are delighted to have received instructions to disperse the entire dairy herd on behalf of A & K Hembrow of Babbington Farm, Lostwithiel which is being removed to Exeter Livestock Market for convenience of sale on Friday 21st August 2026.

Alan and Karenza Hembrow have made the difficult decision to retire from dairy farming, which has been their life since arriving in September 1995 at Babbington Farm with 39 cows.

From such a small beginning, they have built up an impressive dairy herd based on all year-round milk production and buying-in their replacements.

The breeding policy is to use quality pedigree Charolais natural service bulls which are regularly rotated. The resulting beef progeny are reared to forward stores which are sold in Exeter and Hallworthy markets and realise premium prices. The in-calf heifers are served to a pedigree Aberdeen Angus bull, 'Atlantic Evolution x317'.

The cows are farmed on a simple system, milked in a herringbone parlour twice a day and housed in the winter in straw yards. The cows are fed to yield in the parlour with a TMR consisting of grass and maize silage with a blend in outside feed bunkers. Alan and Karenza operate a flying herd system and have always bought top quality dairy cattle from both Holsworthy and Exeter markets with cattle purchased from cubicle housed herds. The cows are grazed day and night as one group from April until housing, which is usually November.

Milk sold per cow – 8633kg, 4.39BF, 3.43P, cc158

The cows are not milk recorded but included in the catalogue is the most recent cell count for each cow.

Calving Pattern

The herd is all year round calving with the following pattern

April-August (62), September-October (47 Dry Cows) & November-January (44).

Herd Health

The cows were vaccinated for BVD, Lepto and Ecoli in spring 2026, and are Johnes tested. No evidence of IBR has ever been found in the herd and bulk milk samples confirm this. The herd has recently been Bluetongue vaccinated and has had its second vaccination (August 2026). The herd passed their pre movement test on 11th August 2026.

Auctioneer's Comments:

The dairy herd at Babbington is an impressive, all year-round calving herd which consists of large framed Holstein Friesian cows with good udders, legs and feet. Karenza Hembrow has managed and milked the cows over the whole period of their farming career. Her dedication and attention to detail in managing a large-scale dairy herd is evident to see here and the cows are in excellent body condition. The dairy enterprise at Babbington Farm has been the cornerstone of a mixed farm business which is being restructured. The calving pattern is mainly early spring to late autumn and should suit clients looking to boost milk production and sell the valuable resulting Charolais calves.

Comment from Nutritionist

This sale marks the end of era for Alan, Karenza and family.

Alan & Karenza present their complete dispersal of **168 exceptional cows**, a herd built with care, consistency, and an unwavering commitment to performance. These cows stand firmly in the top tier of commercial production which runs at 9,000kg 4.3 fat & 3.55 Protein with scc 160. Cows calve all year round to manage annual level production. — a profile that speaks to both genetic strength and disciplined herd management.

This sale marks the conclusion of a long chapter of dedicated dairying, and offers buyers a rare opportunity to secure cows that deliver reliability, longevity, and high-value milk. This is a herd with power: strong production, strong components, strong cows. Whether you're expanding, upgrading, or targeting higher solids, these cows offer immediate impact and long-term value.

The herd is managed on a strictly commercial basis with the emphasis on cost effective milk production. Cows are milked twice daily and loose housed during the Winter months. The herd is grazed night and day when the seasons allow whilst buffer fed a basic grass/ maize TMR. The cows also receive top-up in parlour feeding to yield.
