Vendors are reminded that all accredited stock entering the May Fair must be accompanied by an **SAC Valid Certificate of Status** which must be signed and dated for the current event (show and sale).

These certificates and movement licenses must be handed in to the market office on arrival.

In order to protect the accreditation of all vendors the Sheep Breeders' Association has asked that all vendors of MVA sheep send or fax a photocopy of the S.E.H.S. form to the Auctioneers at least one week prior to the sale day. Please note that the original forms still need to accompany the sheep and be presented to the Auctioneers **PRIOR TO UNLOADING**. The old MAFF SH20 Certificate is not acceptable and has been obsolete since 31 March, 1997.

Scrapie Monitored Sheep

A copy of the Certificate of Registration under the DEFRA Scrapie Monitoring Scheme must be lodged with the Auctioneers at least one week prior to the sale day.

What's new for Dorset sheep?

The Poll Dorset and Dorset Horn breed has a proud history of progressive breeding. Following AHDB funded research and support from the Centurion Breeding Group, the Dorset breed now has a range of breeding values for abattoir traits.

What has performance recording achieved in the Dorset breed?

The latest data shows clearly what has been achieved in the breed through selective breeding over the last 25 years.

Dorset lambs now have the potential to finish more quickly. Compared to lambs born in 2000 the average Dorset lamb now has the potential to finish over a week earlier.

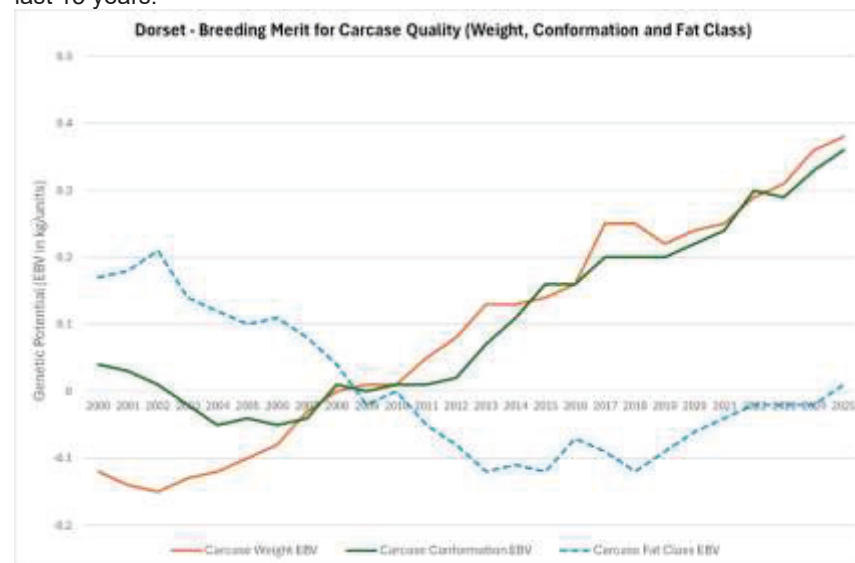

What is the impact at the abattoir?

A review of over 7,500 Dorset abattoir records supports these findings. The progeny by the highest rated rams finished a week earlier than sires with lower genetic merit.

Sire Rating for Growth	Number of lambs	Impact on slaughter age (days)
*****	1442	-3.1
****	1396	-2.0
***	1688	0.6
**	1090	0.3
*	1921	4.1

How do faster growth rates influence carcass value?

Reductions in finishing times have been accompanied by genetic increases in carcass weight and conformation, without any significant change in fatness over the last 15 years.

What's next?

Sheep breeding is at the dawn of a genomic revolution, whereby information about an animal's DNA can be used to enhance our predictions of breeding potential - as we do in the dairy industry. The Centurion group are already actively genotyping their flocks to find those sheep with superior genes for growth rate and carcass merit.

For more information

Signet produces a range of breeding values for both terminal sire traits and maternal traits (like milk and prolificacy) to help ram buyers select the most profitable rams for their flock.

SPECIAL SALE CONDITIONS

Important to Buyers and Vendors

1. **Note to Purchasers:** The Auctioneers do all in their power to see that the Lots are properly described in the Catalogue from the information furnished by the Vendor(s) who supply such statement(s) and is (are) alone responsible for any error or misstatement there maybe. Any sheep in a Lot not answering the description will be subject to the following conditions but no complaint will be entertained by the Auctioneers after sheep have left the pens (unless subject to Condition 3 below) and in all cases of dispute the Purchaser will be required to keep all sheep in question subject to the allowances stated.
2. The bidding to be regulated by the Auctioneers. If any dispute arises the Lot in dispute may, at the discretion of the Auctioneers, be put up again and resold. No person shall retract his or her bidding. All Lots to be paid for at the close of the sale and to be at the risk and expense of the Purchaser from the moment they are sold. Immediately after the fall of the hammer the Purchaser shall give his name and address and shall remove the stock immediately after the sale with all the faults and errors of description, if any. The Auctioneers shall be under no liability either to the Vendor or the Purchaser in any way and, if any dispute arises between the Vendor and the Purchaser, which cannot be amicably settled, the remedy, if any, of the Vendor shall be against the Purchaser and vice versa.
3. If, under special circumstances (the decision as to whether the circumstances are special or not to be decided by the Auctioneers) a buyer is unable to examine his purchases on Sale Day, he should inform the Auctioneers before leaving. In which case the buyer must make any complaints as to description afterwards, in writing, to the Auctioneers together with a Veterinary Report, by the third day after the fair. The buyer to bear the cost of the veterinary fees. No complaint will be considered unless this condition is strictly observed. **BUYERS** are however expressly requested, wherever possible, to make their examinations and any claim arising **ON THE DAY OF THE SALE**.
4. **RAMS:** All Rams and Ram Lambs will be sold as warranted of getting stock. In the case of incapacity of any Ram or Ram Lamb, the Purchaser must notify the Auctioneers, in writing, within three months of the date of the sale, after which no complaint will be entertained. If it is established that any Ram or Ram Lamb is incapable of getting stock and such incapacity is not due to injury suffered or illness contracted since the date

of the sale, then the Purchaser may return it at his own expense to the Vendor and the Vendor shall refund the purchase price in full or make a replacement with a Ram or Ram Lamb acceptable to the Purchaser. In no case shall the Vendor be liable for a sum exceeding the amount which the Ram or Ram Lamb was sold (and any expenses awarded under the following paragraph).

In the case of any dispute between the Vendor and the Purchaser as regards the incapacity or otherwise of any Ram or Ram Lamb then the Vendor and Purchaser shall mutually agree upon a Veterinary Surgeon to examine the Ram or Ram Lamb to declare whether or not, in his opinion the Ram or Ram Lamb is capable of getting stock and, if found to be incapable, then he shall decide whether or not its incapacity is due to injury suffered or illness contracted since the date of the sale. The Veterinary Surgeon's decision shall be accepted as final and binding on both parties and the party at fault shall pay the Veterinary Surgeon's fees.

5. **EWES:** An allowance of 30% of the selling price shall be made to the Purchaser by the Vendor for any Ewe which does not answer the age of the Lot (unless otherwise stated at the time of the sale) BUT NO ALLOWANCE shall be made for any Ewe which may be found to be younger than the description given. Likewise, an allowance of 40% of the selling price shall be made to the Purchaser by the Vendor for any Ewe which is wrong in udder having been described as good on udder, subject to supporting Veterinary Certificate. All Ewes up to full mouth age are sold as good on teeth and under unless otherwise stated.

REGULAR DRAFT: Ewes must be of right age having lambed three times only and be good on tooth and udder.

DRAFT EWES: No warranty unless otherwise stated.

GOOD ON TOOTH AND UDDER: Ewes described thus should be correct in the mouth (i.e. Full mouth, no corner teeth missing) and not diseased or deformed in the udder.

6. **FEMALE SHEEP NOT DESCRIBED AS IN LAMB:** A female sheep, which is not described in the catalogue, or at the time of the sale, as in lamb, is warranted as not being in lamb. If within 14 weeks after the day of the sale a female sheep warranted as aforesaid proves to be in lamb, and within 14 weeks and 5 days after the day of sale, the purchaser gives to the Auctioneers written notice supported by a certificate signed by a slaughterhouse manager, a veterinary surgeon, or other competent person, that such female sheep has proved to be in lamb then, either the Purchaser may return the sheep and her lamb, if any, to the Vendor, or, at the sole

option of the Purchaser, the Vendor shall pay to the Purchaser as and for ascertained and agreed, liquidated damages, to cover all expenses, depreciation in value and other damages, whatsoever, a sum equal to 30% up to £100 and 40% thereafter of the purchase price of the sheep. Where a purchaser exercises his right, under the Conditions, to return an animal to the Vendor he shall be entitled to the return of the purchase money paid and to a refund of the reasonable costs and expenses incurred by him in obtaining any veterinary surgeon's certificate or other person's certificate or opinion which he is required to furnish under these Conditions in order to exercise his right.

7. **LAMBS:** Unless otherwise stated at the time of the sale, a pen described as Ewe Lambs shall contain only Ewe Lambs, and a pen described as Wethers shall contain only Wethers – any other pen of Lambs shall contain Ewes or Wether or both (All male lambs must be Wethers). An allowance of 25% of the selling price shall be made to the Purchaser by the Vendor for any Wether lambs found to be in a pen described as Ewe Lambs and a further 10% shall be allowed by the Vendor for any Ewe Lamb sold in a pen found to contain a Ram Lamb or a Rig (Subject to supporting Veterinary Certificate). Likewise, an allowance of 25% of the selling price shall be made to the Purchaser by the Vendor for any Rig or Ram Lamb found to be in a pen of Lambs. These allowances shall include any expenses incurred by the Buyer for the castration of any Ram Lambs or Rigs or other charges.
8. **BUYERS:** Must carefully check the number of sheep in each pen bought and notify the Auctioneers of any discrepancy before leaving the sale site. Shortages cannot, in any circumstances, be considered once the sheep have left the pen which they were allotted by the Auctioneers.
9. **VENDORS:** Are reminded that any sheep penned in the Fair, whether sold by auction, or privately, are subject to the commission charges and must, if sold privately, be booked through the Auctioneer's Sale Office.
10. All prize winning sheep must be bona fide sold by the Auctioneers, failing which, the prize money may be withheld.
