FOREWORD

Kivells are delighted to have received kind instructions to disperse THEKNOWLE herd of Pedigree Holstein Friesians on behalf of Alan Woollacott & family of The Knowle, Clayhidon, Cullompton, Devon. The herd is being moved to Exeter Livestock Centre on Friday 17th July for convenience of Sale.

Raymond & Beryl Woolacott started the milking herd on 1961 with British Friesians and in 1983 their son Alan took over the management of the herd. The decision was made to go down the Holstein route and THEKNOWLE pedigree prefix was established. In more recent years Alan's son James has taken over the day to day managed of the herd.

The difficult decision has now been made to disperse the Dairy herd and pursue other opportunities.

Herd Averages & management:

The herd is milked twice daily through a 10 point Autotandem parlour and are Cubicle Housed. The Cows are grazed throughout the summer months and fed a partial TMR diet.

The herd is NMR recorded with the following annual average:

9183Kgs 4.04%BF 3.23%P cc131

Calving Pattern:

The herd is all year round calving with the following pattern:

March-April (22), May-July (32), August-October (31),
November-December (10) & January-February (10).

Herd Age:

This is a young herd with 38 milking heifers, 19 second, 28 third, 12 fourth and 16 fifth plus calvers demonstrating the longevity of the herd.

Herd Health:

The herd is vaccinated for Lepto, BVD & IBR as well as being screened regularly for Johnes. All Dry cows are treated with UbroStar Red antibiotic and sealant. The herd has been **TB FREE since 2021** and the latest annual TB test was done on 18.05.2026.

Auctioneers Comment

With so few genuine dispersals taking place at the present time this sale brings to the market a super herd of Cows which are well balanced with excellent udders. There is a good number of fresh milk as well as many to calve in this autumn. A sale not to miss!

Vet comment:

I am writing with some useful health information about the Knowle herd. The cows have been routinely vaccinated against the following diseases: BVD, Leptospirosis, IBR, Salmonella, Calf scour – the dry cows.

The herd has engaged in the Animal Health and Welfare pathway and no evidence of BVD has been found.

Fertility is good with a 385-day expected caving interval and the health measuring eartags are very effective at heat detection.

BULK CELL COUNT is routinely below 100

Yours Sincerely

Piers Pepperell M.R.C.V.S., B.V.M. & S.

The following animals will be sold in Guineas (£1.05)

EXETER LIVESTOCK CENTRE

Matford Park Road, Exeter, Devon, EX2 8FD

Kivells are delighted to have received instructions on behalf of J D Pritchard of Lilwall Farm, Kingston, Herefordshire to disperse the early portion of his autumn calving commercial herd of Holstein Friesian cows. The herd will be removed to Exeter Market for convenience of sale on Friday, 17th July 2026. James Pritchard purchased Great Quebb Farm, Eardisley, Herefordshire in 2019 with the existing autumn calving herd and over the next few years, supplemented with private consignments of similar type cattle calving in the autumn. The herd has been run mainly in-calf to beef with a small percentage of heifers being reared.

The cows are run on a simple, yet effective, grass-based system with all cows calving in the autumn from mainly August, September and October. They are fed to yield in the parlour and fed grass silage with a simple forage box feeding system. The herd is grazed from spring through to autumn, reflecting a cost-effective and profitable management strategy. Cows are milked twice daily through a herringbone parlour and are cubicle housed. The cows are not officially milk recorded, but a recent herd cell count recording has been undertaken. The cows have been served mainly to AI Charolais and were synchronised with their first service on 13th December 2025 and will be due on 12th September 2026. Following this, they were running with a pedigree Aberdeen Angus bull in order to maximise efficiency for autumn calving and increase calf value. The herd is Johnes screened quarterly for the last 5 years and has recently been vaccinated for BVD, Leptospirosis, and IBR. The whole herd was TB tested on 22nd June 2026.

Milk Sales per Cow: 7,000kg milk sold per cow. 4.3% BF, 3.5% PTN.

Average cc of cows in the sale: 166.

Age Profile:

48 of the milking portion are 1st and 2nd calvers. Including 25 first calvers, 23 second, 17 third, 9 fourth and 4 fifth plus.

Vendor's Comments:

We chose Kivells to sell our cattle, after previously buying through them and finding the process very straight-forward and professional. Now that the time has come to sell our herd, we have been highly impressed with the diligent, efficient and stress-free service we have received. The team's professionalism and attention have really stood out, and we are extremely grateful for all the hard work they have made on our behalf. We would also like to thank Patterson Transport who we have dealt with for many years with livestock transported to us from as far away as The Pennines. They have always been reliable with well-equipped lorries and excellent drivers.

Auctioneer's Comments:

The cows are managed on a very low-cost system to maximise profit on an autumn calving pattern. The cows are productive and accustomed to a practical simple system, making them ideally suited to a range of dairy operations. The herd is medium sized, with good udders, legs and feet and are used to walking long distances to graze the whole farm. The consignment of dairy cows will include some early autumn calving heifers as well as approximately 90 milkers, mainly in-calf to AI Charolais. The cows for sale have been selected for the early part of autumn milk production and are thoroughly recommended for all commercial milk producers.
