## FOREWORD

Kivells are delighted to have received kind instructions to disperse THEKNOWLE herd of Pedigree Holstein Friesians on behalf of Alan Woollacott & family of The Knowle, Clayhidon, Cullompton, Devon. The herd is being moved to Exeter Livestock Centre on Friday 17<sup>th</sup> July for convenience of Sale.

Raymond & Beryl Woolacott started the milking herd on 1961 with British Friesians and in 1983 their son Alan took over the management of the herd. The decision was made to go down the Holstein route and THEKNOWLE pedigree prefix was established. In more recent years Alan's son James has taken over the day to day managed of the herd.

The difficult decision has now been made to disperse the Dairy herd and pursue other opportunities.

### **Herd Averages & management:**

The herd is milked twice daily through a 10 point Autotandem parlour and are Cubicle Housed. The Cows are grazed throughout the summer months and fed a partial TMR diet.

The herd is NMR recorded with the following annual average:

**9183Kgs 4.04%BF 3.23%P cc131**

### **Calving Pattern:**

The herd is all year round calving with the following pattern:

March-April (22), May-July (32), August-October (31),  
November-December (10) & January-February (10).

### **Herd Age:**

This is a young herd with 38 milking heifers, 19 second, 28 third, 12 fourth and 16 fifth plus calvers demonstrating the longevity of the herd.

### **Herd Health:**

The herd is vaccinated for Lepto, BVD & IBR as well as being screened regularly for Johnes. All Dry cows are treated with UbroStar Red antibiotic and sealant. The herd has been **TB FREE since 2021** and the latest annual TB test was done on 18.05.2026.

### **Auctioneers Comment**

With so few genuine dispersals taking place at the present time this sale brings to the market a super herd of Cows which are well balanced with excellent udders. There is a good number of fresh milk as well as many to calve in this autumn. A sale not to miss!

**Vet comment:**

I am writing with some useful health information about the Knowle herd. The cows have been routinely vaccinated against the following diseases: BVD, Leptospirosis, IBR, Salmonella, Calf scour – the dry cows.

The herd has engaged in the Animal Health and Welfare pathway and no evidence of BVD has been found.

Fertility is good with a 385-day expected caving interval and the health measuring eartags are very effective at heat detection.

BULK CELL COUNT is routinely below 100

Yours Sincerely

Piers Pepperell M.R.C.V.S., B.V.M. & S.
