 Holder of the world record for the highest
 production of both milk and butterfat.
 Total lifetime yield 365.5 tons milk,
 14.990lbs butterfat.
 "With every morning dew
 we will remember you"
 R.I.X.

FOREWORD

Norton & Brooksbank are extremely honoured to present this catalogue for the sale of virtually the entire **WINTON** herd on behalf of Peter & Judith Waring and family. Winton has been a name synonymous with dairy cattle breeding with a rich history stretching almost 80 years since the herd was first founded by the late John Waring in 1948. During the 1970's & 80's, particularly, Winton rose to be one of the most sought after breeding establishments in the country with numerous bulls leaving for AI as well as service sires being used in leading herds across the UK, with the likes of the hugely popular Winton Citation cementing the herds place in Britain's dairy history.

The Waring family moved to their current location at Field House Farm, near Beverley, in 1989 and have continued to the present day breeding pedigree Holsteins whilst continually investing in new cow families to fuel their enthusiasm for quality dairy cattle. For many years Peter has been in attendance at sales throughout the country, always with an eye on suitable additions to the herd, and you will see that this catalogue is a veritable who's who of the Holstein breed. However, Peter & Judith feel that the time is right to take a step back from day to day chores, and after many decades of milking cows, the management of the farm will transition to their son James and his wife Becky, who along with their own son Jake, will continue the Winton legacy.

This sale marks the beginning of retirement plans for Peter & Judith and in turn, provides a great opportunity to all dairy producers to purchase some superb stock and in large numbers. Almost 170 cows will sell in milk or dry with one of the main features being the youth of the herd. Almost 130 sell in their 1st or 2nd lactation! The youngstock are a particular attraction being very well reared and in super condition throughout. When you consider the sires and back pedigrees, these youngsters surely provide an opportunity for the future not to be missed.

The herd is managed on a strictly commercial basis with the emphasis on cost effective milk production. Cows are milked twice daily and housed in cubicles during the Winter months. The herd is grazed night and day when the seasons allow whilst buffer fed a basic grass/maize TMR. The cows also receive top-up in parlour feeding to yield. **Current herd average production runs at almost 10,500kg 4.15 fat (3.1% p) with scc 150.** Cows calve all year round to manage annual level production.

Health status

Please see letter provided by Howells Vets but to re cap, the Winton herd is fully vaccinated, monitored (and low risk) for Johnes and resides in a 4yr TB parish with the last clear test being in Dec '24. There has never been a case of TB on this holding.

It should also be noted that the herd is fully vaccinated for Blue Tongue with recent booster allowing for travel to Scotland under the new regulations.

Website: www.howellsvets.co.uk

Howells Veterinary Services have been working with the Waring family since 2017, and I have been one of their regular vets for the last six years. With regular fertility visits, monthly milk recording and a comprehensive vaccination program, the health of the herd is a high priority for the whole family. We regularly discuss important aspects of herd health and production together, and the farm has a full recent farm assurance compliant health plan.

Genetics has always been a very important consideration and the pedigrees on offer are outstanding. Embryo transfer programs regularly take place on farm for the exceptional pedigree cows. Several frozen embryos of high genetic merit are also included in the sale.

The adult cows are vaccinated for IBR (with marker vaccine), BVD, leptospirosis, clostridial disease and Q fever. The herd is also vaccinated for bluetongue; cows and youngstock have had a full primary course in the last two months.

Calves are vaccinated for IBR, RSV, PI3 and Mycoplasma bovis. Neospora and Johne's disease are tested for annually in individual milk samples and the herd has an up-to-date National Johnes Management Plan certificate. All calves are tested for BVD for Tag & Test with no positive results in the last six years. The herd is on a 4 yearly TB testing interval.

I have thoroughly enjoyed being part of the farm team and we wish the Waring family all the best for the future.

EXPLANATION OF ABBREVIATIONS AND SYMBOLS

The following abbreviations: ABI- Alphabetical Bull Index; ACC- Average Cell Count; AI- Artificially Inseminated; CC- Heifer Calf; ET- Embryo Transplant; LC- Last Calf; S- Served.

TYPE CLASSIFICATION SCHEME- Where classifications are abbreviated in the catalogue the following are the abbreviations used:

(Ex)-Excellent; (VG)-Very Good; (GP)-Good Plus; (G)-Good; (F)-Fair; (P)-Poor

METRICATION: All tabulated milk yields are in kilograms.

ENTRY TO SALE PREMISES

All visitors please note that entry to the sale site is at your own risk. No liability whatsoever can be accepted by the vendors or the Auctioneers.

ANIMAL WELFARE

All purchasers please be aware of the implementation of EU Welfare in transport Regulation (EC) No 1/2005 - when hauling livestock.

PAYMENT

Payment must be made in full to the Auctioneers on the sale day. No lots may be removed from the sale premises without an auctioneers pass confirming payment.

Prospective purchasers who have not traded with the auctioneers before are requested to make themselves known prior to commencement of the sale and confirm arrangements of payment.

AGENCY BIDDING

Any customer at the sale bidding as an Agent on behalf of a third party is deemed by the auctioneers to be the purchaser and subject to the terms of the conditions of sale, unless written authority from the person(s) on whose behalf they are bidding is presented to the auctioneers before the sale commences

Telephone Bids: Please note that any potential buyer wishing to bid over the telephone must register with the auctioneers before the sale.

Terms: All purchasers please note that accounts must be settled at the close of the sale.

BREEDING GUARANTEE

All cows and heifers that are stated in the catalogue of sale to have been served not less than ten weeks before the date of sale, or to have been running with a bull between dates (the later of which is not less than ten weeks before the sale) will be guaranteed by the vendor to be in calf either to the date or one of the dates of service if more than one is stated, or to a service between stated running dates and to the bull stated in the catalogue of sale unless any alteration is announced by the Auctioneers at the time of the sale. Should any animal prove not to be in calf, any claim under this guarantee must be made to the auctioneer in writing within 7 weeks of the date of sale. Should any animal which is declared to be in calf prove not to be in calf to the date or one of the dates of service or to some date within the running period or periods or to the bull stated as above any claim must similarly be made immediately any evidence in support of such a claim is available and in any case not later than 28 days after the date on which the animal was due to calve according to the date or dates in the catalogue of sale.

UDDER WARRANTY

Unless otherwise stated or announced, any cow in calf or in milk or any heifer in milk at the time of the sale shall carry a guarantee that she is sound in udder and teats at the time of sale, but no claim under such guarantee can be entertained unless made to the Auctioneers within an hour of the close of the last lot except in the case of Herd Dispersal Sakes or Breeders' Home Sales when the guarantee period is extended to two hours after the close of the sale of the last lot. If the Auctioneers are satisfied that the udder is not sound, then the sale, at the discretion of the vendor, may either be cancelled or an adjustment in the price paid agreed between vendor and purchaser.

NOTE - At Herd Dispersal or Home Breeders' Sales the Vendor must provide adequate facilities for udders to be inspected and for adequate milking facilities to be available for the Purchaser in accordance with the warranty.

DATA PROTECTION

Introduction

The EU General Data Protection Regulation ("GDPR") came into force across the European Union on 25th May 2018 and brings with it significant changes to data protection.

Our Commitment

Norton & Brooksbank Ltd are committed to ensuring the security and protection of the personal information that we process, and to provide a compliant and consistent approach to data protection. We have always had a robust and effective data protection program in place which complies with existing law and abides by the data protection principles. However, we recognise our obligations in updating and expanding this program to meet the demands of the GDPR and the UK's Data Protection Bill.

Norton & Brooksbank Ltd are dedicated to safeguarding the personal information under our remit and in developing a data protection regime that is effective, fit for purpose and demonstrates an understanding of, and appreciation for the new Regulation. Our preparation and objectives for GDPR compliance have been summarised and copies are available from our office upon request.

**SALE TO COMMENCE
AT 10.30 a.m.**

**Holding No: 51/277/0024
NMR Herd No: 01/71120/04

~ NOTES ~

CONDITIONS OF SALE

1. The biddings to be regulated by the Auctioneers, in terms of 'guinea' bids and multiples thereof, each guinea to be equivalent to 105 new pence (£1.05); if any dispute should arise, the lot in dispute to be put up again and resold, or the Auctioneers may determine the dispute at their discretion and their decision shall be final. The Auctioneers reserve the right to refuse the bid of any person without being called upon to give a reason for such action.
2. The Purchaser to give his name and dwelling place and pay for all lots at the close of sale. No lot or lots shall be removed from the sale premises until paid for, and pass-out slip obtained from the Auctioneer' clerk.
3. Notwithstanding the foregoing and the following Condition 4 each and every lot shall immediately at the fall of the hammer be considered as delivered and be and remain in every respect at the absolute risk and expense of the respective Purchaser or Purchasers thereof and shall be removed from the sale at the Purchaser's expense within a week of the sale.
- 4.1. If any lot or animal (s) is not paid for in cash under Condition 2 above but payments is made by cheque or other form of negotiable instrument then the animal(s) shall remain the sole and absolute property of the Vendor as legal and equitable owner until such time as all money due to the Vendor has been paid by the Purchaser, Payment shall unless otherwise agreed be made to the Auctioneers and shall not be deemed to have been paid until any cheque or other negotiable instrument has been cleared by the Auctioneers Bankers and the following further provisions contained in Condition 4 shall apply.
- 4.2. The Purchaser acknowledges that he is in possession of the animal(s) as bailee for the Vendor until such time as the animal(s) has been paid for or pursuant to the provisions of Condition 4.1.
- 4.3. The Purchaser undertakes to house any animal on his premises separately from his own and those of any other person and in such a manner which makes them readily identifiable as the Vendor's.
- 4.4. The Purchaser's right to possession of such animal(s) shall cease if he does anything or fails to do anything which could entitle a receiver to take possession of the animal(s) or which would entitle any person to present a petition for the winding up of the Purchaser.
- 4.5. The Vendor or the Auctioneers may for the purpose of the examination or recovery of animals enter upon any premises where they are housed or where they are reasonably thought to be housed.
- 4.6. If the Purchaser shall sell on the animal(s) the entire proceeds shall be held in trust for the Vendor and shall not be mingled with any other money paid into any overdrawn bank account and shall at all times be identifiable as the Vendor's money.
- 4.7. The Purchaser warrants that he is not at the time of entering into any agreement to purchase the animal(s) insolvent and knows of no circumstances which would entitle any creditor to appoint a receiver or to petition for winding up or to exercise any rights over and against the purchaser's assets.
- 4.8. Without prejudice to any other to any right or remedy of the Vendor or the Auctioneers of the Purchaser shall be in breach of any of the conditions set out in this Condition 4 or any of the other conditions herein contained the Vendor or the Auctioneers shall have power to resell the lots retaining any surplus and charging any deficiency or expense to the defaulter or Purchaser.
5. All statements in the catalogue or made by the Auctioneers at the time of the sale, also the identification of the animals, are the entire responsibility of the Vendor. The Auctioneers take no personal responsibility for the correctness of any such statement or identities.
6. All statements made either in the catalogue or any made by the Auctioneers at the time of the sale relating to Tuberculin or any tests to be taken as statements of fact only. No such statement shall guarantee the Purchasers of any animals against loss arising through subsequent reaction of such animal to any test administered after the sale and the Vendors shall not be liable in any way should this occur.
7. Neither the Vendor nor the Auctioneers will be responsible for any accident through fire or any other cause whatsoever, nor for any damage done by animals prior to, during or after the sale.
